PROFESSIONAL SUMMARY

Full Stack Software Engineer with **7+ years of experience in software development**, including **4 years working with modern JavaScript stacks (TypeScript, Node.js, React)**.

Strong experience building and maintaining scalable web platforms, APIs, and content-driven applications with React, Next.js, Node.js, and Laravel.

Skilled in SQL and NoSQL databases, REST/GraphQL APIs, and performance optimization.

AI-assisted development with Claude Code, Cursor, Codex, and Lovable, including a personal harness of skills, subagents, and hooks to orchestrate multi-agent workflows for planning, implementation, testing, and code review.

Comfortable working in cross-functional teams and distributed environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Escola do Caos

2022 – Present

- Development of scalable web applications using **React, React Native, Node.js, and NoSQL databases**.
- Design and maintenance of backend services and APIs for course and video management platform.
- Implementation of performance optimizations and improvements in user experience.
- Support and evolution of a short-video application, including feature implementation and bug fixing.
- Collaboration with product, marketing, and design teams to translate business requirements into technical solutions.
- Active use of AI-assisted development tools (Claude Code, Cursor, Lovable) to accelerate development, refactoring, and testing.
- New institutional website built with React + Supabase, with lead capture integrated with RD

Freelance Full Stack Developer — Various clients

2019 – Present

- 80+ projects delivered, including web systems, institutional websites, and landing pages.
 - Delas Network: platform for managing influencers, brands, and events, plus a curated supplier directory (Laravel 12, React + TypeScript, PostgreSQL, Docker).
 - Alucinados por Guitarra: marketplace for instruments, courses, and luthiers (Next.js, Payload CMS, PostgreSQL, Cloudinary).
 - Integrations with CRMs and APIs (HubSpot, RD Station, Apollo, Omie) and payment gateways (PagSeguro).
 - Custom WordPress themes and plugins focused on performance and SEO.
-

Front-End / Full Stack Developer — SBPNL

2018 – 2022

- Development and continuous optimization of WordPress-based platforms focused on performance and SEO.
 - Backend and frontend management of service platforms using **PHP**, **MySQL**, and custom integrations.
 - Implementation of secure integrations and scalable backend logic.
 - Performance tuning and database optimization.
 - Improvement of UX and system usability through iterative enhancements.
-

TECHNICAL SKILLS

Languages & Core Stack

- JavaScript (7+ years)
- TypeScript (4 years)
- Node.js (4 years)
- React (4 years)
- Next.js
- PHP / Laravel

Backend & APIs

- REST APIs
- GraphQL
- Express.js

- Authentication flows
- Data modeling

Databases

- SQL (6 years – MySQL, MariaDB, PostgreSQL)
- NoSQL (4 years – MongoDB, Firebase, Supabase)

Cloud & Dev Tools

- AWS (foundational usage)
- Git
- Docker
- Cloudflare Workers
- Webpack
- NPM/Yarn
- CI/CD with GitHub Actions

Other

- Performance Optimization
- Responsive Design
- SEO technical optimization

Applied AI for Development

- Tools: Claude Code, Cursor, Codex and Lovable in daily workflow
 - Harness engineering: personal library of skills, subagents, hooks and configuration for Claude Code
 - Multi-agent orchestration: planning, implementation, debugging and code review pipelines
 - Tool integration via MCP (Model Context Protocol)
 - Prompt and context engineering (CLAUDE.md, decision records, specs)
 - Spec-driven development (PRD → tasks) with AI-assisted TDD
-

EDUCATION

Technical Degree in Computer Science with Emphasis on Programming
Centro Paula Souza — Completed in 2011
